## EXPERIENCE

### Payaza • Lagos, Nigeria

Senior Frontend Engineer

Nov 2024 - Present

- Led end-to-end rebuild of a multi-tenant event ticketing platform serving creators, businesses, and attendees — supporting multi-day events, dynamic per-day ticket configurations, and advanced attendee management. *Next.js, Typescript, Figma, APIs.*
- Accelerated junior outputs with the following: code review, a consistent component library, tokenization, reducing review time, and improving delivery across the team.

### Gigeasy • Texas, Houston

Frontend Contractor

Jun 2025 - Dec 2025

- Built the frontend for an AI-powered insurance broker platform, engineering a dynamic form system that reduced over 243 questions down to a focused, guided flow so brokers could complete complex workflows without the overwhelm. *Nextjs, APIs.*

### Bitreport • Zagreb, Croatia

Frontend Web & Mobile Engineer

Jan 2024 - Sept 2024

- Built a rich-text document management system (mini Google Docs) with role management, ownership transfer, drafts, and folder organization using Remirror, Tiptap, and Zustand; followed by post-delivery codebase & UI/UX improvements. *React Native, React.js, Typescript, Figma, React Query, Zustand.*

### NAVI • Lagos, Nigeria

Mid-level Frontend Engineer

Oct 2022 - July 2024

- Led a 6-member tech team to ship an MVP and V1 of a hospitality and events platform on time, serving as the primary frontend engineer and UI/UX consultant — and the only team member retained through company-wide layoffs. *Figma, React, Redux.*

### HireForceOne • Belgium, Europe

Frontend Engineer II (Contract)

Jan 2024 - Feb 2024

- Built an interconnected career visualization system from scratch after replacing a failed codebase — featuring a custom date-driven slider that simultaneously synced a water tank animation, skill acquisition graphs, and job detail panels, with collision-aware timeline rendering and real-time Framer Motion transitions across the entire UI.

### **Manaknight Digital • Ontario, Canada**

React Engineer

Aug 2022 - Aug 2023

- Contributed as a frontend developer at a digital agency, working across 16+ projects, including betting platforms, e-commerce sites, and others, while supporting 7 client accounts and helping build an internal BaaS solution that cut development overhead across the team. *WebGL, AWS, Docker, React, Vue.*

### **Gomova • Abuja, Nigeria**

Mobile Engineer

Nov 2023 - Jan 2024

- Debugged and stabilized two React Native logistics apps for iOS and Android, resolving integration issues across Firebase, Google Maps, and Flutterwave — and turned down a CTO offer at the end of the engagement. *React Native, React.*

### **Mytherapist.ng • Lagos, Nigeria**

Mobile Engineer

Nov 2021 - June 2022

- Built features for a mental health app – my first production React Native experience.

### **Zuri & Kodecamp • Lagos, Nigeria**

Intern

Nov 2020 - July 2021

- Completed structured engineering training, building small apps, and laying the foundation for a career in frontend development.

## SKILLS

---

JavaScript, Typescript, Python, HTML/CSS · Reactjs, Nextjs, React Native, Vue, Nodejs, Solidity  
Tools: Git, Figma, Atlassian, Xcode, Android Studio, AWS, Claude Code, Firebase, Supabase

## EDUCATION

---

University of Jos, Nigeria · BSc Psychology · 3.2 GPA · 2019 - 2025

Prior coursework in Information Science (CS 101 - 206) before switching to Psychology.
