EXPERIENCE

Frontend Web & Mobile Engineer (Freelance)

Jan 2024 - October 2024 | BitReport - Croatia (Remote)

- Developed a robust document management system similar to a mini Google Docs, with features like upload, view, creation, deletion, role management, ownership transfer, folder organization, archiving, updating, duplicating, and drafts. Customized the editor using Remirror and Tiptap, and utilized TypeScript and GraphQL for data handling and user permissions.
- Performed code cleanups, UI adjustments, and bug fixes to enhance application performance and user experience.

Senior Frontend Engineer (Part-time)

January 2024 - July 2024 | NAVI - Nigeria (Remote)

- Developed a comprehensive ticketing system supporting diverse event types, ticket categories, and user roles including partners, businesses, super admins, admins, and end users.
- Led a team of 6 to refactor the codebase and build a mobile application for the ticketing system
- Offered a CTO position as a recognition of leadership and contributions to the development and refactoring of the ticketing system and mobile application.
