Jeyi Adole | Senior Frontend Engineer

UTC+1 (CET-aligned) ·meetjeyvers@gmail.com · jeyvers.com · linkedin.com/in/jeyi-adole · github.com/jeyvers

Summary

Senior Frontend Engineer with 5+ years shipping React.js and TypeScript products that people move real money through. At Payaza, own frontend architecture, payments UI, multi-currency wallet and balance displays, KYC onboarding, and reconciliation dashboards used by 50,000+ monthly users.

Work comfortably in both Next.js and Vite, in strict TypeScript and in large legacy JavaScript codebases. Treat errors, empty states, and failure paths as product features, and use session and funnel data to check what happens after a release, not just whether the PR merged.

Experience

Payaza — Senior Frontend Engineer · Lagos, Nigeria (Remote) · Nov 2024 – Present

- Own payments UI, wallets, and reconciliation dashboards across NGN, USD, EUR, GBP, KES and multiple payment providers, where every amount must match the ledger — Next.js, TypeScript, Tailwind
- Led the rebuild of EventPorte, a multi-tenant ticketing and payments platform, including creator wallets that trace every balance to its transactions; zero rollbacks, 32 new client sign-ups
- Built KYC onboarding flows to compliance requirements with audit-ready data handling
- Cut mobile landing-page LCP by ~93%, from 33s to 2.3s (Lighthouse), by right-sizing images, compressing video, and trimming font preloads
- Set frontend standards and a shared component library, cutting PR review time by 35%; mentored junior engineers
- Instrumented Clarity and Mixpanel across 50,000+ MAU to find drop-offs and validate rollouts

Bitreport — Frontend Engineer · Zagreb, Croatia (Remote) · Jan 2024 – Sep 2024

- Built a Google Docs-style document platform for web and mobile: rich-text editing, real-time collaboration, role-based access, drafts, ownership transfer and folders
- Shipped internationalisation (i18n) across the product
- Handled contenteditable state and real-time conflict resolution across distributed clients with Remirror and Tiptap — React, React Native, TypeScript, Zustand, React Query
- Integrated Sentry error tracking and session replay across web and mobile, cutting production incidents by 45%

NAVI — Mid Frontend Engineer → Senior Frontend Engineer · Lagos, Nigeria · Oct 2022 – Jan 2024

- Promoted to Senior; architected an event-ticketing system with multiple event types, ticket categories, and business, end-user, and admin roles, leading a 5-person team
- Shipped MVP and V1 on schedule with 99.2% uptime, handling 10,000+ concurrent bookings during peak sales
- Led a 6-person team shipping a hospitality platform MVP and V1 on React, TypeScript, and Firebase; the only engineer retained through a company-wide restructuring
- Built the component library and design system foundations, cutting development time by 25%, and delivered WCAG AA-accessible responsive interfaces

Gigeasy — Senior Frontend Engineer (Contract) · Houston, TX (Remote) · Feb 2022 – Sep 2022

- Built the dynamic questionnaire engine for an AI-powered insurance broker, turning a 243-question intake into a guided, branching flow that syncs in real time with quoting and compliance services
- Delivered policy lifecycle, license gating, document generation, and partner integration workflows across a complex regulated domain
- Wrote Jest suites covering branching form logic and used PostHog session analysis to fix drop-off points before release

HireForceOne — Senior Frontend Engineer (Contract) · Belgium (Remote) · Aug 2021 – Feb 2022

- Rebuilt a failing codebase into a production career-visualisation system, migrating React/Redux to Next.js, TypeScript and Tailwind
- Set up CI/CD on GitHub Actions with automated testing gates, cutting manual release steps by 80%

Manaknight Digital — React Engineer · Ontario, Canada (Remote) · Aug 2020 – Aug 2021

- Delivered frontend for 16+ production projects (betting, e-commerce) in a 30+ developer org across 7 client accounts — React, Vue, AWS, Docker
- Co-built an internal backend-as-a-service platform and SDKs, cutting development time by about 15%

Personal projects

- Rest My Case — Built and shipped a web app where verified people settle disputes before a random jury of five, with secret votes and on-chain payouts — Next.js, React 19, TypeScript, Solidity on Celo, Supabase
- lets —An installable PWA that matches people nearby who want company for the same activity, with location-aware matching and notifications — React Native, Expo for Web

Speaking

- **GDG OOU Frontend Masterclass** (Jan 2026) — “Framework Mastery: Techniques & Architectural Patterns”

Technical skills

- **Frontend:** React.js (React 18/19), TypeScript, JavaScript (ES6+), Next.js, Vite, React Router, React Native, PWAs
- **Architecture:** frontend architecture, scalable component systems, multi-tenant apps, responsive design
- **State, data and forms:** Redux / Redux Toolkit, Zustand, React Query, react-hook-form, Yup
- **UI and design systems:** component libraries, design tokens, Sass, Tailwind, Radix, Framer
- **Quality:** WCAG AA accessibility, Core Web Vitals and performance, i18n, Jest, RTL, Playwright
- **Security:** XSS prevention, CSRF protection, nonce-based CSP, secure handling of tokens and user data
- **Observability:** Sentry, LogRocket, PostHog, Microsoft Clarity, Mixpanel
- **Delivery:** Git, Yarn, ESLint, Prettier, Husky, conventional commits, GitHub pull-request review, GitHub Actions, GitLab CI, Docker (containerised frontend builds), AWS (EC2, S3), Vercel
- **Also:** Node.js, Firebase, Supabase, Web3 (Celo, wagmi, viem, Privy, Solidity), Cursor, Claude

Education

University of Jos, Nigeria — BSc Psychology, 2025 · 4.0/5.0 CGPA
